SPONSORSHIP DOSSIER · 2027 SEASON

AROUND THE DREAM

by Heron Salgado

A life around the sea.

From the European horizon to the challenge of sailing around the world.

INTERNATIONAL MOTH · BRA 133

November 2026

The sea as a way of life.

Heron is Brazilian, a lawyer by training, and has lived in Spain for almost a decade. Anyone who sails with him sums it up quickly: he is always lending a hand, to anyone, anywhere.

He has crossed the Atlantic more than ten times. And what he learns at sea he does not keep to himself: he loves teaching all of it, from sailing to wingfoiling and kitefoiling.

Now another chapter begins: the International Moth, with the Brazilian flag and the 2027 European Championship on the horizon.

Brazil	Law	Spain	Atlantic	Moth
THE ORIGIN	HIS TRAINING	ALMOST A DECADE	10+ CROSSINGS	BRA 133 · 2027

From the kite to the Moth.

His love of foiling began with the kite. That is where his two passions met: the sea and boats.

A foil is a wing under the water. With speed it creates lift and raises the board or the hull: less friction, more speed and the feeling of flying. The same principle works on a kite, a wing and the International Moth.

1 Mast

The vertical piece that joins the hull, or the board, to the wings working under the water.

2 Fuselage

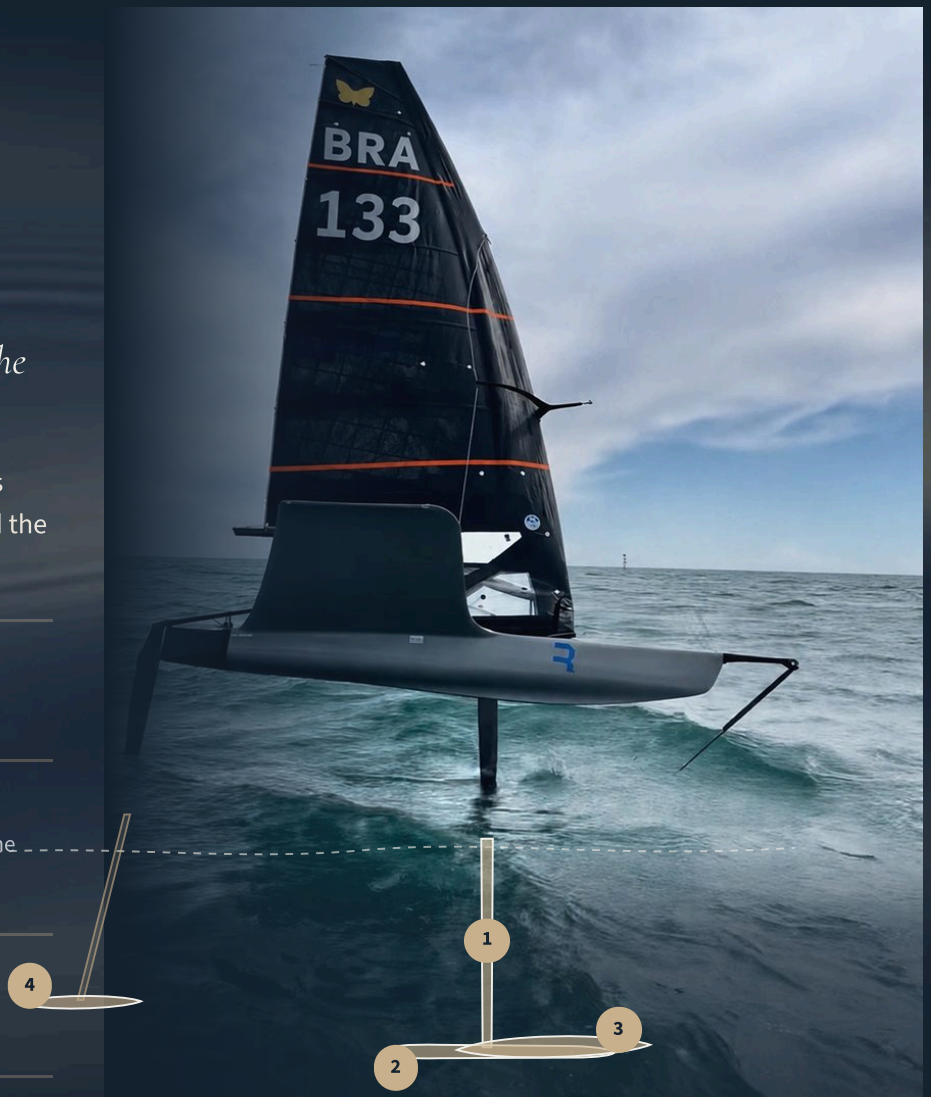

The body that keeps the wings aligned. On a kite or wing foil it joins the front wing to the stabiliser; on the Moth, the stabiliser sits on the rudder.

3 Front wing

The one that carries the load. With speed it pushes upwards and lifts the hull out of the water.

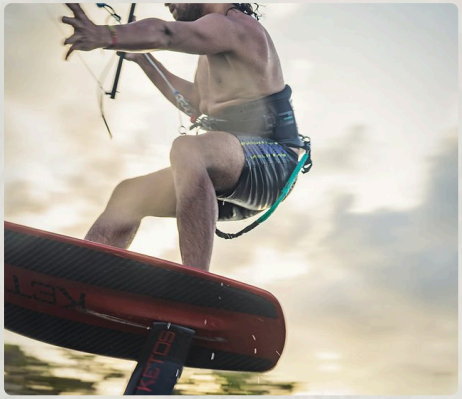

4 Stabiliser

The small wing at the back. It gives balance and controls pitch.

Heron's Moth, BRA 133. Real photo above the water; below the surface, the parts are drawn.

Step into Heron's sea.

Kite

Where foiling began for him. The kite, the board and that moment when the water stops holding you back.

Wing

A wing in your hands and the wind. Another way of flying over the water, freer and simpler.

Boat

More than 10 Atlantic crossings. Watches, manoeuvres and horizon: the sea seen from the deck.

Learn

What he loves most is sharing it. Sailing, wingfoil, kitefoil: Heron enjoys teaching everything he knows about the sea.

04 / 2027 SEASON

European Championship

A new horizon for Brazilian sailing.

In 2027, Heron aims to compete in the Moth class European Championship, representing Brazil.

The ocean has no borders.
Neither do great dreams.

ORIGIN	BACKGROUND	ALMOST A DECADE	JOURNEY	THE CLASS	EUROPEAN CHAMPIONSHIP	HORIZON
Brazil	Lawyer	Spain	European sailing	International Moth	2027	Around the world

Sail alongside Heron.

This is not about putting a logo on a sail. It is about standing beside someone who lives the sea, shares it and teaches it, in a project that starts in Europe and looks out to the world.

An opportunity to be part of a story.

WHERE IT FITS

Foil, kite and wing gear

Equipment on the water, in the hands of someone who enjoys explaining it.

Nautical apparel

From the deck of an ocean crossing to the Moth's pontoon.

Tourism and destinations

Places that live from the sea and want to tell it with someone who knows it from the inside.

Ocean programmes

Initiatives that look after the sea or bring people closer to it.

CONTACT

Shall we build this story?

To talk about the project and how to become part of it.
